

Selling Tips:

How to sell the Companion

- ✓ 1. "The B&W Companion is a step-up from the traditional 5th Wheel hitches. It has many great features that give you a great ride."
- ✓ 2. "First, do you ever use your truck when you're not towing? If you do, this hitch is totally removable when you are not towing. There won't be any 'rail system' in the bed of your truck when you are doing other things"
- ✓ 3. "The locking jaws on the Companion are a full 1 1/8" thick. These jaws are machined to fit around your kingpin, so there is no 'sloppiness' and the jerky starts and stops are eliminated."
- ✓ 4. "The ride is exceptional with this hitch. The Companion has a coupler that rides on polyurethane that cushions the ride. Also, a built-in shock absorber allows a controlled side-to-side tilt"
- ✓ 5. "The Cam operated jaws allow effortless hook up and release, even when you are parked in an uneven area."
