

Selling Tips:

How to sell the Tow & Stow

- ✓ 1. "This is the last receiver hitch you will ever need"
- ✓ 2. "With 2", 2 5/16", and 1 7/8" ball sizes available on one hitch, you will be ready to pull any bumper trailer"
- ✓ 3. "You can raise or lower the hitch in one inch increments so you have a safe and level tow."
- ✓ 4. "This hitch is made of steel and has a single locking point, so you can put it on, lock it, and be confident that you will be ready to tow any trailer for years to come."
- ✓ 5. "Best of all, when you are not towing, the hitch stows under the bumper, out of the way of shins and garage doors!"
